

# PURECO TREATS A SIGNIFICANT AMMOUNT OF CONTAMINATED INDUSTRIAL WATER IN HANOI

Hanoi, Vietnam, 2017

HSDC (Hanoi Sewerage and Drainage Ltd.)

restaurant and a motor service

wastewater treatment

ENVIA TNB oil separators, PARCO-P grease separators

4 l/s

In Hanoi, rivers and lakes are extremely polluted, which is considered as one of the causes of contaminated but untreated wastewater being discharged by local hotels, canteens, restaurants into the public sewerage system and after into the rivers and lakes. In order to minimize the harmful effect of untreated industrial, process water generated by their everyday activities, two restaurants and a motor service decided to solve the problem and complex and sustainable wastewater treatment systems had been installed with Pureco products. PARCO-P grease separators and ENVIA TNB oil separators help to treat the process water of the restaurants and the motor service.

*oil- and grease separation / environmental friendly solution / clean rivers and lakes*
