

SUSTAINABLE STORMWATER MANAGEMENT AT PENNY NETWORK

10 projects in Romania, 2019-2020

Penny Supermarket

rainwater retention at Penny shopping centers

stormwater management

retention tanks from corrugated steel

10 projects with more than 1,000 m³

Sustainable stormwater management is a keyword at the biggest shopping malls as well, such as the Penny network in Romania. Having built a very good professional relationship with Penny in Romania, we got the chance to provide innovative and sustainable solutions for the stormwater handling of the new Shopping Centers (in 10 sites in Romania). Retention with corrugated steel spiral tube technology resulted in the draining of the rainwater falling down on the covered parts of the shopping malls (parking place, roof, etc). Fast installation, less groundwork, longlife product and sustainable rainwater management system, this is what Pureco provided to Penny.

more than 1,000 m³ capacity / stormwater retention in corrugated steel tubes / fast installation / sustainable solutions
