rainwater retention at  
Târgoviște Mall

stormwater management

retention tank with an  
integrated pumping station

450 m<sup>3</sup>

Pureco provided a complex stormwater solution at a pumping station. For stormwater retention, we installed corrugated steel spiral tanks with a capacity of 450 m<sup>3</sup>. It means 8 tubes with a diameter of 2.5 and with a length of 13 meters. Integrated pumping station for rainwater and for irrigation with fully automatized control panel integrated with BMS.
