

STORMWATER RETENTION WITH PURECO PRODUCTS IN BULGARIA

Plovdiv, Bulgaria, 2020

stormwater management

Proinfra Ltd.

retention tanks

shopping center

200 m³ (2 × 100 m³ tanks)

We are pleased to present our very first project in Bulgaria. As a sustainable, innovative solution, Pureco corrugated steel tanks were delivered to the existing shopping center in Plovdiv Plaza mall. For stormwater retention, we installed tanks with a capacity of 200 m³. The tanks from corrugated steel were the fastest solution due to the short construction period of time without influencing the operation of the center.
